

Carlyle School

Cycle 1, year 2

Dolphins are nice. They do tricks and if you drown they can help you. They are soft and jump through hoops. Dolphins are my best sea animal in the world. If dolphins could talk I would say to a dolphin, "You are very special." The dolphin would say, "Thank you." and I would say, "You're welcome."
Dalliyah Henry

If horses could talk I would say "Hi Mr. Horse how is your back today?" The horse would say, "It is okay, just a little sore from those horseback riders." I would then say "Hey let's go get some ice cream!" And would get on his back and ride with him.

Celeste Hodges

We like to recycle because we want to make the world clean.
Anosan Velichore

Recycling is important because it makes old stuff turn into new stuff.
Ebony Bramwell Heart

I will recycle so my world looks nice for the future people.
Kyriakos Dafniotis

I recycle because I don't want the planet to be dirty and we recycle because we don't like the planet full of garbage.
Zachary Sullivan

People should stop polluting the earth or else it will be gone and animals will die.
Antonio Rodriguez

Cycle 2, year 1

I am concerned about people shooting animals. Some animals are getting extinct. Animals like raptors are getting eaten by animals that are their predators. When their mothers die the young get killed by their enemy. I am concerned about lions in the wild because there are hunters that come out and shoot them. Panda bears are losing their habitats. African elephants were hunted for their tusks. Tigers are hunted for their skin and for sports. Gorillas are in danger because they are losing their habitat. They are hunted for meat. Sea turtles are getting killed and not protected. I wish people would stop shooting the animals so animals do not become extinct.
Nizmee Wuvais

I am concerned about my family's health because I always want them to be healthy especially my grandma and great-grandma. My grandma had a leg operation so sometimes it is hard for her to do things. My great-grandma is in the Philippines. In the Philippines, nurses, doctors and medicine are expensive. My brother and I have asthma. So, I want us to be healthy for a lifetime starting today. So if we eat healthy and stay active, we won't need to worry about our health anymore!
Alexi Fuentes

I'm really concerned about animals because humans keep shooting animals for their coats. Humans cut trees to make paper and desks. The trees are the animals' homes, like the falcons, snowy owls, vultures, hawks, bald eagles, humming birds and others. People keep building houses so some animals lose their homes. Some are almost getting extinct like wolves and beavers. I'm concerned about all the animals because they're losing their homes and I don't want that.
Nicholas McQueen
