Migration Cycle 2, Year 2

I am on a ship from India to America. I was very sad that I had to leave India. I really miss my grandparents. I was weeping in the inside trying not to cry. When I reached the Mayflower I sat alone looking out the window waving at my grandparents crying. There were so many people around me but no one sat next to me when suddenly a man came up to me and asked me, "Can I sit next to you?" I didn't answer because I didn't know English. The man didn't do anything and just sat down the man looked scary with those mean looking eyes I was very scared. When he got up I looked out the window, I saw the most beautiful thing, it was buildings, beautiful buildings there was a lady screaming, "Come here!"

By: Parth Patel

When I was leaving India to America I wish my parents would come with me. I was devastated. When I was on the boat I said "Good bye" to my parents and then the boat left. I was sad to leave the country. I was walking I joined them in the game. When I was talking to him I asked him, "What is your name?" He said, "Carlos!" I said, "That's a cool name," Then the boat stopped, it stopped in Canada "That's my stop!" I said good bye. In Canada they have lots of stuff like shopping, restaurants and lots of buildings. Then one day I found gold under the rock. I said, "I would keep it and won't give it to anybody." I went to the hotel for one week. Then the next day I went to buy clothes for myself, and I used my gold to buy my stuff for me. Then my gold was finished I had no more gold left.

I am a girl at about ten years old sailing to America on the Mayflower. My family and I are moving to "The golden land" because the king did not let us believe in the religion we wanted. In the room we slept in it was very crowded. Many in my family had to sleep together because there were a lot of other people, including other families. We weren't allowed to go on the deck a lot because at first, and a bit at the end there was a big storm so we could not go up that much. There was a day when it was very sunny we were allowed to go onto the deck. The clear blue sky glittered like I never saw it before. The fresh air felt so wonderful. The wind rushed through my hair. It was like the wind blew me away to an undiscovered world full of flowers and green grass. When we reached the "golden land" it was like something you couldn't explain. There were huge trees and a big spot of green grass. The trees were very tall and on the spot of the green grass there were many colourful flowers. All the children that were on board, they raced out of the sailing ship and played in the flowers.

CHORES FOR HAITI

I have been doing chores for Haiti. Some of the chores I have been doing are cleaning my room and taking out the recycling. My dad said I will get \$2.00 to take out the recycling, \$1.00 to make my bed, and \$3.00 to do the vacuuming. I will help my mom cook and I will feed my cat. I know that

Haiti is a very poor country, so I will do these chores and try to raise \$20.00 for the people who are suffering. I will try to do all the chores that I said I would do. I feel very proud of my grade five class that wants to help the people of Haiti who have gone through such a difficult time.
