

School daycare services complement the educational services provided by the school and are primarily focused on recreational activities.

Our Philosophy, Purpose and Goals

- ☺ To ensure the safety and general well-being of the children served
- ☺ To contribute to the achievement of the objectives of the school's educational project/mission statement
- ☺ To set up activities and recreational projects that contribute to the children's overall development
- ☺ To encourage the development of social skills such as respect, co-operation and openness to others
- ☺ To offer homework support after school by providing students with an appropriate place in which to work
