

## Library/Technology

### Library

Library books should be returned on the due date. A book can be renewed for a longer period of time by returning it on the due date and having it re-stamped with the new due date. Children with overdue books will not be permitted to take out other books. If a library book is lost or is severely damaged, parents will be asked to pay for the book. Our library technician is supported by dedicated volunteers who, together, ensure that our students have access to the library on a regular basis

### Information Technology

Our computer lab consists of 30 computers, a lab top, two laser printers, a scanner and an overhead projector. There are computers and overhead projectors in each classroom as well. A number of our classrooms also have *Smartboards* installed. All our computers are hooked to the school board's network which allows access to the Internet. The students have access to printing from the lab as well as from their classroom. Our multi-media teacher has developed an excellent website at [www.emsb.qc.ca/easthill](http://www.emsb.qc.ca/easthill). We encourage parents and students to visit the website on a regular basis.
